# THE COMPANY

Since 2022, Seven Star Elevator Systems has been at the forefront of transforming home mobility solutions. Our innovative elevators are meticulously designed with cutting-edge technology, offering a breathtaking 360-degree panoramic view while maintaining a minimal footprint. Utilizing air, the most abundant resource on Earth, our lifts provide a unique, eco-friendly solution that seamlessly integrates into your home.

# OUR VISION

At Seven Star Elevator Systems, our vision is to bring luxury into every home through innovative, safe, and affordable home lift solutions that enhance the quality of life. Manufactured with precision and care, our state-of-the-art elevators seamlessly blend advanced engineering with elegant design, ensuring a perfect balance of sophistication and practicality.

We are committed to excellence, prioritizing customer satisfaction and leveraging cutting-edge technology to deliver high-end mobility solutions that integrate effortlessly into any home. With a focus on safety, innovation, and affordability, we strive to make luxury accessible for everyone, transforming homes with unparalleled style and functionality.

# OUR ELEVATOR

Revolutionizing home mobility, vacuum elevators blend cutting-edge technology with aesthetic appeal, offering efficient vertical transportation with a 360-degree panoramic view. Eco-friendly and space-efficient, they reduce energy consumption and require minimal installation space, ideal for any residence. Engineered with safety mechanisms and user-friendly interfaces, vacuum elevators ensure accessibility for all, delivering long-term reliability and performance.

# SAFETY FEATURES

At Seven Star Elevator Systems, safety is our foremost priority. Our vacuum elevators are outfitted with an extensive range of advanced safety features, ensuring a secure and dependable vertical transportation experience. From automatic descent mechanisms during power outages to mechanical emergency brakes and electromechanical interlocks, each element is carefully designed to provide the highest level of protection.

## Comprehensive Safety Features

Our vacuum elevators feature reliable emergency braking systems to ensure passenger safety during unforeseen circumstances or power outages. In the event of vacuum loss, mechanical emergency brakes engage promptly within a span of two inches, ensuring immediate safety.

Our vacuum elevators utilize strong polycarbonate sheets, providing a transparent and durable enclosure that enhances safety while maintaining an elegant design.

The vacuum elevator is equipped with a panic button and audible buzzer to provide a quick and effective emergency response mechanism.

During a power failure, the vacuum elevator ensures a smooth and safe descent, thanks to its integrated descent control system.

Our vacuum elevators are equipped with **CE/UL** Certified electromechanical door locks imported from France to ensure passenger safety at each landing. These advanced locks engage securely, providing reliable protection and peace of mind.

# CERTIFIED PRODUCT

Our elevators are ISO 9001 certified, ensuring that they meet the highest standards of quality management and performance. This certification reflects our commitment to delivering products that are reliable, safe, and built to exceed customer expectations. By adhering to strict quality control processes, we guarantee that every elevator we produce upholds the highest levels of excellence and consistency.

# POLYCARBONATE ENCLOSURE

Our vacuum elevators utilize high-quality polycarbonate sheets made from resin, renowned for its exceptional durability and optical clarity. These sheets not only enhance the sleek and modern appearance of our elevators but also offer superior impact resistance, ensuring long-term robustness and safety. The resin provides excellent UV protection, preventing yellowing and degradation even with prolonged exposure to sunlight. This ensures that the elevator maintains its aesthetic appeal and structural integrity over time. By incorporating polycarbonate sheets, we deliver elevators that are stylish, durable, and reliable, providing an elevated experience for any home.

## Features of Polycarbonate Sheets

Our elevators boast polycarbonate sheets 200 times stronger than glass, ensuring exceptional durability, safety, and reliability against impacts and environmental factors. They're the superior choice over traditional glass alternatives.

Our elevators feature polycarbonate sheets that are flame resistant, ensuring heightened safety and peace of mind for users.

Our elevators feature polycarbonate sheets that are weather resistant, guaranteeing durability and peace of mind for users in various conditions.

Our elevators deliver outstanding performance across a wide temperature range, from -40°C to 120°C.

# VACUUM TURBINES

Our vacuum elevator utilizes high-performance Ametek turbines, renowned for their exceptional efficiency and reliability. These advanced turbines ensure smooth and powerful operation, enhancing the overall performance of our elevators. With Ametek's precision engineering, our elevators deliver superior vertical transportation, offering a seamless blend of innovation and durability.

## Features of Ametek Turbines

Ametek turbines are designed for optimal efficiency, reducing energy consumption while maintaining powerful performance.

Known for their durability, Ametek turbines provide consistent and reliable operation, ensuring the long-term functionality of our elevators.

Engineered for reduced noise levels, Ametek turbines contribute to a quieter and more comfortable elevator experience.

Built with high-quality materials, Ametek turbines require minimal maintenance, leading to lower operational costs and increased uptime.

# OUR MODELS

Product VL30

## SINGLE PERSON MODEL

Rated Load : 150 kg  
Diameter : 760mm  
Speed : 0.20 m/s

Available Colors

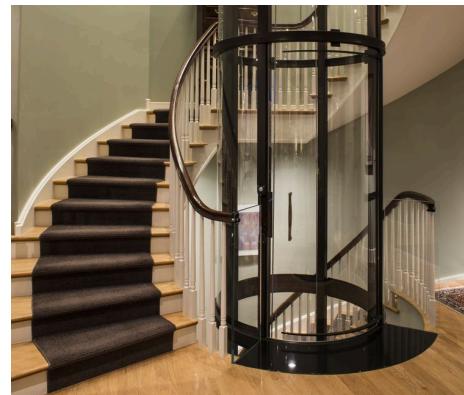

Product VL40

## TWO PERSON MODEL

Rated Load : 150 kg  
Diameter : 760mm  
Speed : 0.20 m/s

Available Colors

Product VL50

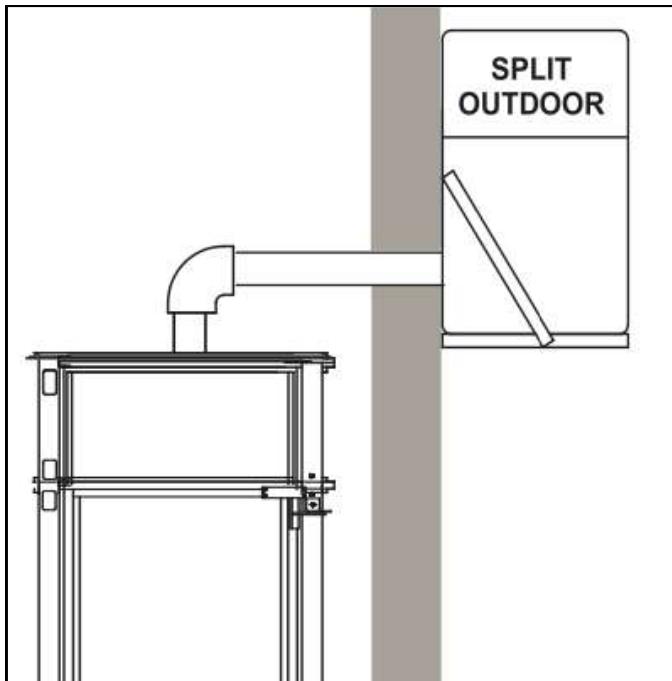

## THREE PERSON MODEL

Rated Load : 150 kg  
Diameter : 760mm  
Speed : 0.20 m/s

Available Colors

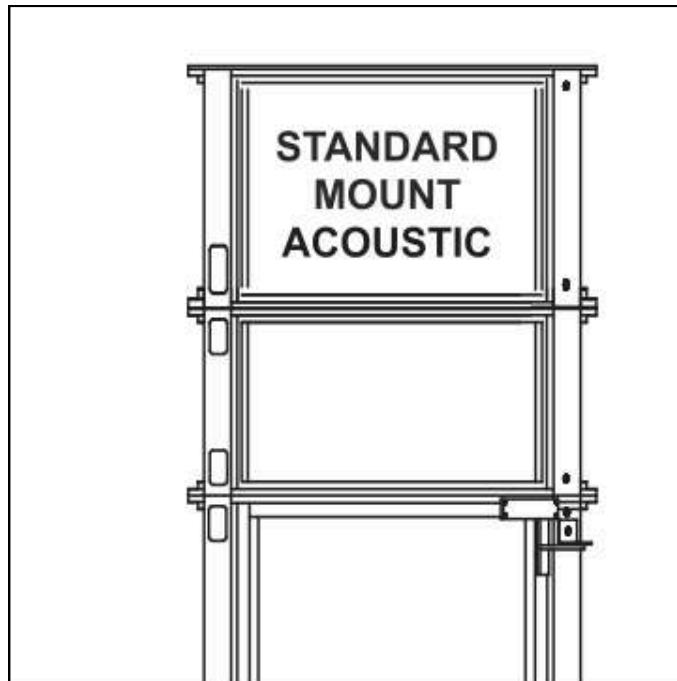

# DUEL VARIANTS

## SPLIT UNIT

Type : Outdoor  
Integration: Additional unit

## ACOUSTIC HEAD UNIT

Type : Indoor  
Integration: Built-in unit

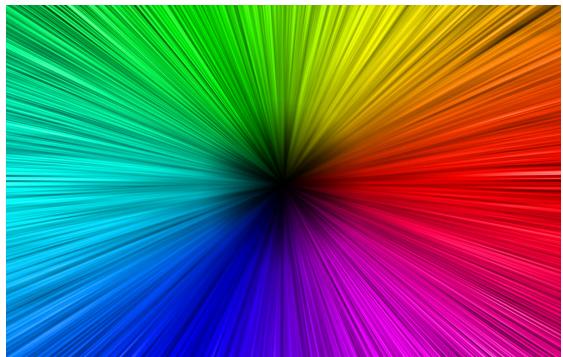

Our elevators come with two distinct head unit variations to suit different needs: the Split Unit and the Acoustic Head Unit. The Split Unit is designed for spaces with limited overhead clearance, offering flexibility in installation without compromising performance.

On the other hand, the Acoustic Head Unit is engineered to minimize noise, providing a quieter and more serene operation. Both variations ensure optimal functionality and can be customized to match your specific design and aesthetic preferences.

# ELEVATOR UPGRADES

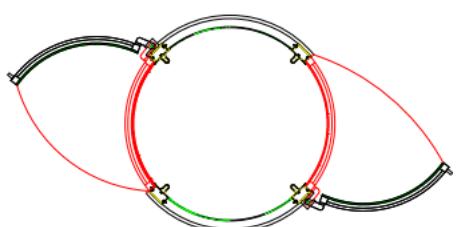

Our elevators come with a variety of add-ons and upgrade options, allowing you to customize them to suit your unique needs and preferences. From enhanced safety features and energy-efficient systems to premium finishes and smart technology integrations, our upgrades are designed to elevate both functionality and style. Whether you're looking for advanced control panels, mood lighting, or sleek cabin designs, our range of options ensures your elevator is as personalized and luxurious as your home.

# SPECIAL PRICE

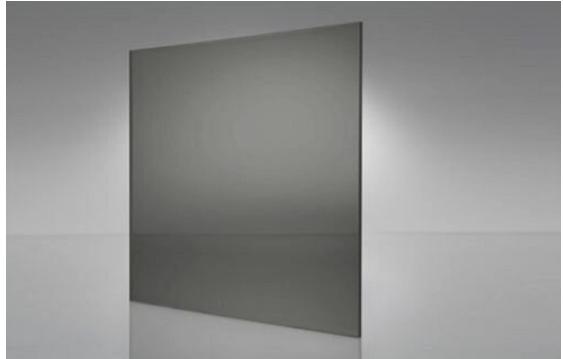

## CUSTOM COLORS

Our frames can be customized to match any RAL color, offering flexibility to suit your design preferences. Black and white are also available as standard options.

## CUSTOM DOOR SWING

The vacuum elevator door can be positioned at 0°, 90°, 180°, or 270° and adjusted for left or right-side openings, ensuring flexibility for any installation needs.

## TINTED SHEET

The vacuum elevator features custom tinted polycarbonate sheets for personalized, durable, and transparent designs.

## REMOTE CONTROL

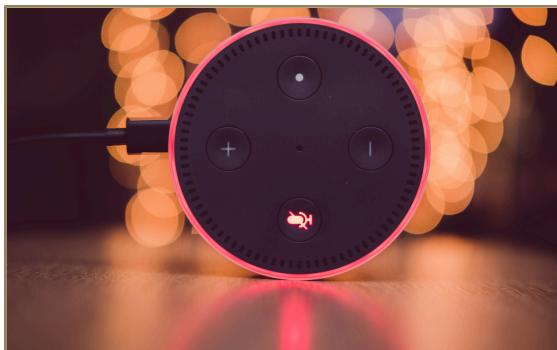

Our elevator system includes remote control functionality, offering convenient, flexible, and easy operation from a distance.

# SPECIAL PRICE

## CABIN PHONE

The vacuum elevator can include a cabin phone, connected to your home line or a SIM module, for seamless and versatile communication.

## SMART INTEGRATION

Our product supports smart home integration and remote control, enabling easy connection with smart devices or convenient operation from a distance.

## CABIN LOCK

The vacuum elevator cabin and car can be equipped with locks to enhance safety, restrict access, and prevent unauthorized use.

## AUTO DOOR CLOSER

Our elevators feature automatic door closers for smooth, reliable operation, enhancing safety and convenience with effortless door closing.
